Dear Mr. Conrad

This is in response to your letter dated December 22, 1992, requesting additional information on the Defense Contract Action Data System (DCADS) data for fiscal years 1976 through 1985, and provides answers to the problems you described.

Enclosure 1 contains a general overview of the data, which may aid you in your understanding of the data. Enclosure 2 contains your list of problems encountered for each of the fiscal years and answers, or information about where to find answers to the questions you stated. Enclosure 3 provides additional footnoted information about the data for each of the fiscal years, and is intended to explain the code changes that may have occurred from fiscal year to fiscal year within one of the five DCADS data formats. Finally, Enclosure 4 contains a record layout of the ZARK locator and contractor files, and is intended to provide answers to the many questions you had concerning the ZARK data.

If I may be of further assistance, please let me know. My point of contact concerning this matter is Mr. Russell Daul, who may be reached at (703) 746-0786.

Deputy Director, Information Operations

Enclosures:
As stated

Purchasing Office Codes

1. Prior to calendar year (CY) 1980, the source document for the purchasing offices was the DoD Procurement Coding Manual (4105.61M), Volume III, "DoD Purchasing Offices," which was available from each of the Military Departments and the Defense Logistics Agency. Please see the enclosed list (Attachment 1). Then, beginning in CY 1980, the Directorate for Information Operations and Reports (DIOR) began to publish its own source document for the purchasing offices. The document's title is Department of Defense Defense Acquisition Management Data System Purchasing Offices List (MN01). The oldest version of this document available within the Directorate for Information Operations and Reports (DIOR) was published in CY 1985, and was provided to you previously.

2. Prior to fiscal year (FY) 1979, four characters were used to represent the purchasing offices. In FY 1979, the Navy began to use five characters to represent their purchasing offices; therefore, in FY 1979, the field size was also expanded to five positions. Then, in FY 1984, an additional position was added. The additional position (or first position) was used to represent the department or service. The field became known as the POFKEY, or purchasing office key.

Additional Fields

Additional fields were also added in FY 1984, such as the LPLAKEY and LPARTIKEY. The LPLAKEY and LPARTIKEY were based on the Federal Information Processing Standard (FIPS) 55-2 publication, which is administered by the Department of the Interior, United States (U.S.) Geological Survey. The code contains information on each place located in the U.S. and the U.S. outlying areas. The first two positions represent the state, and the remaining five positions represent the city. The LPLAKEY is a code which represents each unique place, and the LPARTIKEY is a code which is macro to the LPLAKEY, and represents one or more places. For example, the Pentagon is a place, but it is part of Arlington which represents one or more places. Therefore, the place name in the file would be for Arlington, and not the Pentagon (Attachment 2).

DD Form 1057 Data

Beginning in FY 1984, files began to contain summary, DD Form 1057 data; this may help explain why some of the fields are blank where you are expecting coded information. The IDKEY for the DD Form 1057 data contains all zeroes.

ZARK vs. DUNS

The FY 1983 file contains both ZARK codes and Dun and Bradstreet (D&B) numbers (DUNS) information; however, in FY 1983, the DUNS were optional and we did not officially begin collecting this information until FY 1984. Also,

until FY 1984, the contractor name used in the files was based on the name contained in the ZARK contractor file; however, beginning in FY 1984, the contractor name in the file was based on DUNS file. Also, it is important to note that the DUNS name is always the headquarters name (and not the establishment name), and that the DUNS information is proprietary - only available from D&B. Therefore, to obtain such information, we suggest that you contact D&B directly at the following:

ISA Region Codes

DIOR stopped using ISA region codes in FY 1984. The first position of the Labor Surplus Area (ISA) region code is explained in the Defense Acquisition Management Data System (DAMDS) Code Translation Manual for Computer Listings (FYs 1976 through 1978) or Defense Acquisition Management Data System (DAMDS) Code Translation Manual (FYs 1979 through 1983). Positions two and three identify a specific ISA within the state. No further ISA information is available within DIOR. To obtain such information, we suggest you contact the following individuals at the U.S. Department of Labor: Mr. Bill Mc Garrity at (202) 219-5185 or Mr. Doug Mc Culley (202) 219-4336.

Dollar Value Field

The Dollar value fields in the DCADS datasets contain signed data. If the right-most position of the field contains a number (0-9) or a letter (A-I), the dollar value is positive. The "A" represents the positive number 1; "I" represents the positive number 9; positive zero is always 0. However, if the right-most position of the field contains a letter (J-R) or the left bracket symbol "(", the dollar value is negative. The "J" represents the negative number 1; "R" represents the negative number 9; the negative zero is the ")" symbol.

Fiscal Year Conversion

Between FYs 1976 and 1977, the Government's fiscal year changed from July 1 - June 30 to October 1 - September 30. At the time, 76 was the code used to represent the data for the July to June timeframe, and 7T was the code used to represent the data for October to September timeframe.

Dataset Structures

There appears to be some confusion as to which DCADS data pertains to which dataset formats. There were only five formats for the fiscal year time periods in question (1976 through 1985). The 1976 dataset format (DCADS76.XLS as you call it) pertains to DCADS data from FY 1976 through FY 1978; the 1979 dataset format (DCADS79.XLS) pertains to DCADS data from FY 1979 through FY 1982; the 1983 dataset format (DCADS83.XLS) pertains only to DCADS data for FY 1983; the 1984 dataset format (DCADS84.XLS) pertains only to DCADS data for FY 1984; and finally, the 1985 dataset format (DCADS85.XLS) pertains only to the DCADS data for FY 1985. Please also see Enclosure 3 for more detailed information concerning the differences among the fields of the DCADS data from fiscal year to fiscal year within a given DCADS dataset format.

Section I
FEDERAL SUPPLY CLASS
OR SERVICE CODES
(Item B8A)

SECTION I
FEDERAL SUPPLY CLASS OR SERVICE CODE
(Item B8A)

General

A four-digit code shall be entered in Item B8A for every procurement action reported on DD Form 350. Only one code number should be entered. If more than one code is applicable, enter the code which describes the predominant product or service procured (see also DoD FAR Supplement 4.671-5(b)(8)(i)).

This section is divided into three parts: Research, development, test, and evaluation (RDT&E) codes are contained in Part A; other services and construction codes are in Part B; and supply and equipment codes are in Part C.

RDT&E

If the action is for research, development, test, or evaluation, enter a code from Part A of this section. (RDT&E is defined in FAR 35.001.) Do *not* assign an RDT&E code to housekeeping services or supplies purchased in support of "in-house" research or development work; such services are coded in accordance with Part B of Section I and the supplies in accordance with Part C. Procurement personnel responsible for coding RDT&E actions should obtain sufficient information from requisitioning personnel to permit accurate classification in accordance with Part A.

Other Services and Construction

If the action is for other services and construction, enter a code from Part B of this section. This four-position code consists of a letter identifying one of 20 major categories and three numeric digits identifying a specific service within each category.

Supplies and Equipment

If the action is for supplies and equipment, enter a code from Part C of this section. The classifications used here are those contained in the H-2 series of cataloging handbooks, except for the items contained in Federal Supply Group (FSG) category 19, "Ships, Small Craft, Pontoons, & Floating Docks."

PART A

Research, Development, Test, and Evaluation (RDT&E)

The RDT&E codes in Part A have been developed in accordance with guidelines established by the Federal Procurement Data Center. To ensure that the contract is for RDT&E, check the appropriation symbol. (Do not include housekeeping supplies or services in support of in-house RDT&E even though a RDT&E appropriation symbol is cited.) The following symbols are currently applicable:

ARMY	21X2040	AIR FORCE	57X3600
NAVY	17X1319	DARPA	97X0400.13
NASA	80X0108		

Description and use of code

The RDT&E code is composed of two alphabetical and two numeric digits. The first position is always the letter "A" to identify RDT&E; the second position is a letter from "A" to "Z", used to identify the major category; the third digit is a number from "0" to "9", used to identify a subdivision of the major category. The fourth digit is a number from "1" to "6", used to identify the type of RDT&E. This fourth digit should be *assigned by the contracting officer* in accordance with FAR 35.001 as follows:

First Two Positions of Program Element	FAR 35.001	Fourth Digit of Item B8A Code on DD Form 350 To Be:
61	(1)	1. Research
62	(2)	2. Exploratory Development
63	(3)	3. Advanced Development
64	(4)	4. Engineering Development
All Other	(5)	5. Operational Systems Development
65	(6)	6. Management & Support

When the program element number appears on the purchase document, the first two digits of this number determine the number to be used in the fourth position.

For Army procurements, the third digit of an Army budget activity code *beginning with 6* identifies the appropriate code for use in the fourth position. Code 5 will be entered in the fourth position for all Army budget activity codes beginning with a number other than 6.

When completing this item, the precise service being purchased shall be coded. For example, a contract for research on noise pollution for aircraft should be shown under category AH4*, "Environment, Noise Pollution," and not under aircraft.

PART B

OTHER SERVICES AND CONSTRUCTION

All services and construction work, except RDT&E work, should be coded in accordance with the codes listed in Part B. Each category has been assigned a four-position code for a specific type of service or construction. The code consists of a letter identifying one of 20 major categories and three numeric digits identifying a specific service within each category.

The 20 major categories are:

- E. Purchases of Structures & Facilities
- F. Natural Resources Management
- G. Social Services
- H. Quality Control, Testing, & Inspection Services
- J. Maintenance, Repair, & Rebuilding of Equipment
- K. Modification of Equipment
- L. Technical Representative Services
- M. Operation of Government-Owned Facility
- N. Installation of Equipment
- P. Salvage Services
- Q. Medical Services
- R. Professional, Technical, & Management Services
- S. Utilities & Housekeeping Services
- T. Photographic, Mapping, Printing, & Publication Services
- U. Training Services
- V. Transportation & Travel
- W. Lease or Rental of Equipment
- X. Lease or Rental of Facilities
- Y. Construction of Structures & Facilities
- Z. Maintenance, Repair, or Alteration of Real Property

Due to the diversified nature of the services being purchased by the Department of Defense, it is very often difficult to identify the appropriate service or construction code that applies to a procurement action. If the appropriate code for item B8A cannot be easily determined, the procuring activity should select a code that best fits the description of the service involved and submit a copy of the DD Form 350 in question (with an exact description of the type of service or construction being procured) to:

Washington Headquarters Services
Directorate for Information Operations and Reports
Room 1C535, The Pentagon
Attn: PEID
Washington, D.C. 20301-1155

This will serve as a basis for determining the need for the assignment of new codes or the revision of existing codes.

PART C

SUPPLIES AND EQUIPMENT

All supply and equipment items should be coded in accordance with the codes listed in Part C. Except for the items in Federal Supply Group (FSG) category 19, "Ships, Small Craft, Pontoons, & Floating Docks," the classifications used here are those contained in the H-2 series of cataloging handbooks, covering the Federal Supply Classification system and personnel should refer to these handbooks for a more complete description of the codes. In the case of ships, a more detailed code is provided here than is shown in the H-2 handbooks.

The FSG codes are provided below:

(Item B8C)

SECTION II

SYSTEM OR EQUIPMENT CODES

(Item B8C)

Purpose

The DD Form 350 codes in this section have been developed to facilitate an analysis of DOD procurement by major weapon system,* equipment, or item. Only production items are covered by this coding system; RDT&E work is excluded since it is covered by Section I, Part A, of this manual. In addition to RDT&E, codes in this section also exclude construction, subsistence, clothing/textiles, or petroleum.

Codes generally have been assigned to all production items for which annual programmed procurement is \$2 million or more. However, if an end item or a component identifiable to an end item cannot be identified by a specific code, a request for a code, together with the applicable DD Form 350, should be addressed to the appropriate organization specified in DoD FAR Supplement 4.671-4(d). Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

If a system or equipment code is not applicable to a DD Form 350 transaction, or if the system or equipment bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeroes) shall be assigned.

Description and Use of Code

The code for Item B8C consists of three alphabetical positions. The first position identifies one of the following major categories of equipment:

A	Aircraft	F	Ammunition
B	Aircraft Engines	G	Electronics
C	Missiles and Rockets	H	Other Equipment
D	Vehicles	S	Ships
E	Weapons		

The second position identifies a subdivision of the major category, e.g., fighter aircraft, while the third position identifies the specific item, e.g., an F-111.

Normally, each system or equipment code includes all subsystems, components, repair parts, modifications, repairs, and related supplies and services (other than RDT&E and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines.

When a procurement is for components, parts, or services covering more than one system or equipment and 75 percent or more of the dollar amount is allocable to a single system or equipment, the code for that system or equipment shall be assigned. Otherwise, multi-system procurement shall not be assigned a specific code.

Each department should use only that part of Section II designated for its use, e.g., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

* The definition of weapons system as provided by the *DoD Dictionary of Weapons and Military Terms* is "An instrument of combat with all the related equipment, operating skills, and direct supporting facilities and services required to enable the instrument of combat to operate as a single unit of striking power."

1. Aircraft are arranged by design number within each basic mission symbol, e.g., A-4, A-5, A-6, F-4.
2. Aircraft engines are arranged by design number within type of engine.
3. Missiles and rockets are arranged by design number.
4. Air Force electronics and communications items are arranged numerically by system number.
5. All other categories are arranged alphabetically by key word or words and by caliber size.

If an aircraft, missile, or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in this manual but does have a design number that is listed, the code applicable to that design number should be assigned. For example, an RB-52 aircraft would be assigned the code for a B-52. In addition, the series symbol for an item is not used, e.g., F-111 is used, rather than F-111A or F-111B.

Introduction

This manual contains all Department of Defense purchasing offices that may report data into the Defense Acquisition Management Data System (DAMDS). These purchasing offices are broken down into the five basic DoD reporting components: Army, Navy, Air Force, Defense Logistics Agency (DLA), and Office, Chief of Army Corps of Engineers (OCE). Within reporting component these purchasing offices are sorted by purchasing office key (POFKY).

All data fields are intended to be self-explanatory, with the exception of "DATEOFF". A date in this field indicates that the purchasing office is inactive, with the date representing the date of inactivation.

**DEFENSE ACQUISITION MANAGEMENT DATA SYSTEM
CODE TRANSLATION MANUAL**

FISCAL YEAR 1985

Issued Annually By

Department of Defense
Washington Headquarters Services
Directorate for Information
Operations and Reports

This publication is available to the Federal Government and its contractors from the Administrator, Defense Technical Information Center (DTIC), Cameron Station, Alexandria, VA 22314. And to the general public from Director, National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22151. DTIC/NTIS identification number for this publication is DIOR/MN04-85.

FOREWORD

The first line of each entry identifies the contractor, the place of performance (city and state or country), the contractors unique identification number (DUNS code), and the codes (FIPS) for the place of performance. Data on each individual award to that contractor are then displayed on the following lines. This manual provides information on the meaning of the column headings which apply those lines.

This manual is intended to assist the user of these computer listings in understanding the range of data presented. While the meanings of many of the codes used in the listings are provided here, not all codes have been explained. Where applicable, references have been provided which identify other manuals and/or regulations that the reader may find useful. These publications include the *DoD Procurement Coding Manual; Volumes I and III* (DoD 4105.61M) and DoD Federal Acquisition Regulation (FAR) Supplement sections 4.671-5 and 4.7003-1 and DoD FAR Supplement Appendix N.
